Experiment No:02 **Roll No:69**

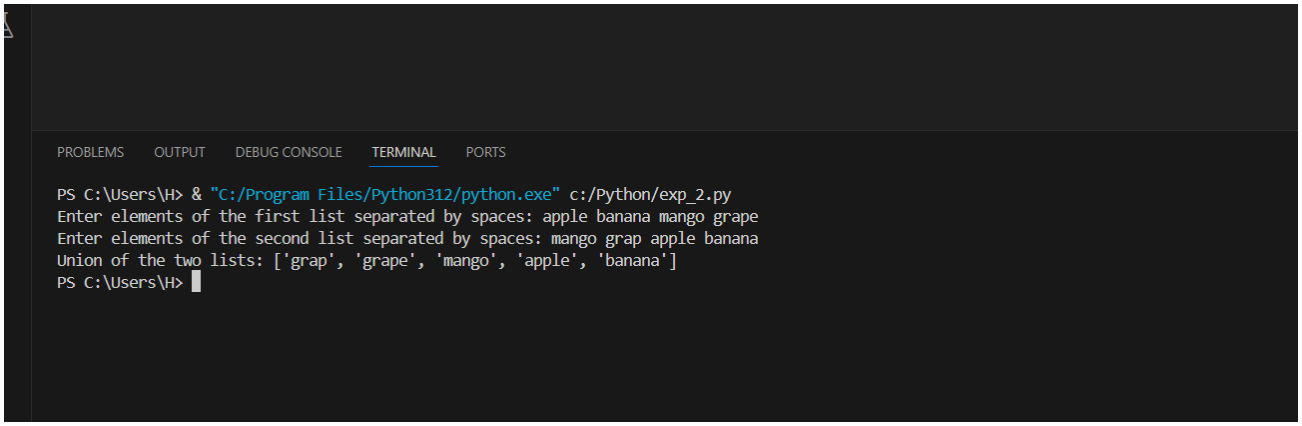
Aim: Program to find the union of two lists.

Code: -

```
list1 = input("Enter elements of the first list separated by spaces: ").split()

list2 = input("Enter elements of the second list separated by spaces: ").split()

union_list = list(set(list1) | set(list2))

print("Union of the two lists:", union_list)
```


Output:
