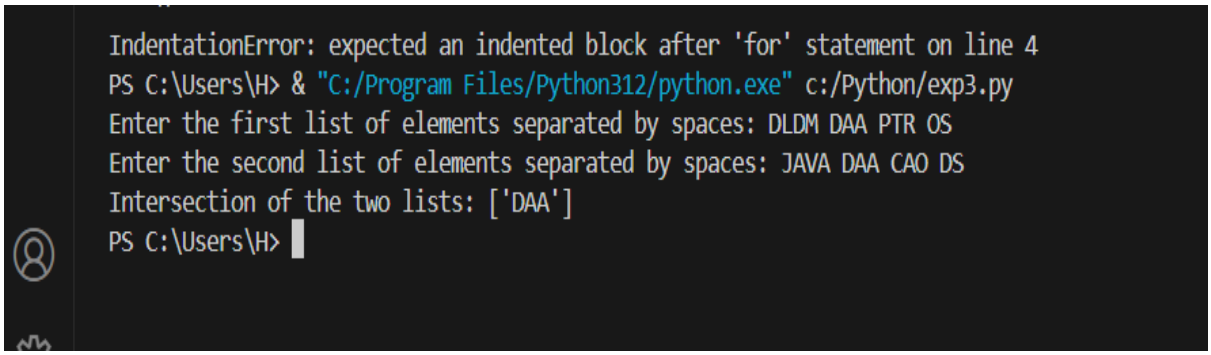
Experiment No:03 **Roll No:69**

Aim: Program to find the intersection of two lists.

Code: -

```
list1 = input("Enter the first list of elements separated by spaces: ").split()
list2 = input("Enter the second list of elements separated by spaces: ").split()
intersection_list = []
for item in list1:
 if item in list2 and item not in intersection_list:
  intersection_list.append(item)
  print("Intersection of the two lists:", intersection_list)
```


Output:
