Experiment No:04 **Roll No:69**

Aim: Program to remove the “i”th occurrence of the given word in a list where words repeat.

CODE:-

```
def demo():
lst1 = input("Enter the list of words separated by spaces: ").split()
target_word = input("Enter the word to remove: ")
i = int(input("Enter the occurrence number to remove (1-based index): "))
count = 0
for index in range(len(lst1)):
if lst1[index] == target_word:
count += 1
if count == i:
del lst1[index]
break
print("Updated list:", lst1)
demo()
```

Output:
